Method of maintenance

1. Clean the surface of the fan blade and the fan guards (rear & front) with clean cloth or wash it with water.

2. Never wash the main body and motor of the fan with water directly.

3. Never clean the fan with solvent, gasoline, thinner or any other chemicals.

4. Please apply lubricant oil in proper quantity on motor shaft periodically.

5. Use wet cloth to clean the fan blade casing and the surface of the motor cover.

6. Should any abnormal operation occur, switch off the electricity at once if there are any parts or other accessories being damaged particularly AC cord.

7. The appliance is not to be used by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge unless they are under supervision or instructions.

8. Children are not allowed to play with the appliance.

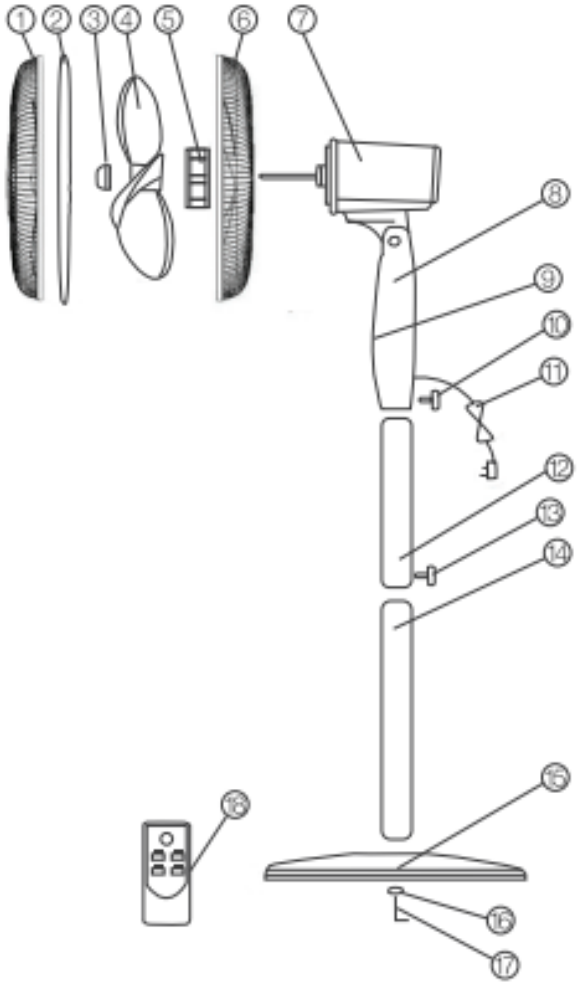
User manual

Thank you for choosing our smart fan. App is based on Smart Life platform, using communication, security, automatic control technologies, integrating the facilities to home life. The aim is to build an efficient management system of residential facilities and family schedule to achieve a smarter living environment. Whenever you turn on your smart phone, you can view and control your devices via the app, which is compatible with IOS and Android systems.

Please read the owner's manual carefully before using this fan!

Name Of Parts :

Item	Components
1	Front Grill
2	Grill Loop
3	Blade Nut
4	Fan Blade
5	Rear Grill Mounting Nut
6	Rear Grill
7	Motor Housing
8	Control body
9	switch
10	Adjustable Pole Tightening knob
11	Power Cord
12	Adjustable Pole
13	Height Adjustment Knob
14	Pillar
15	Base
16	Tin Pad
17	Pillar Tightening Screw
18	Remote



Assembly of the fan grill and blade:

1. Remove the rear grill mounting nut. Place the rear grill onto the motor housing, make sure the handle on the rear grill is up and tighten the rear grill mounting nut.

2. Push the fan blade onto the motor shaft, lining up the blade with the iron stick on the motor shaft's end. Tighten the blade knob by turning it counter clockwise.

3. Hold the front grill and rear grill together and tighten with the grill loop.

Operation:

1. Ensure that the fan in OFF condition.

2. Place the fan on a dry and level surface.
